PROFILE SUMMARY

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience developing responsive web applications, REST APIs, and data-driven solutions using JavaScript, Python, React.js, SQL, and modern development workflows. Skilled in building scalable frontend interfaces, integrating backend services, debugging performance issues, and delivering end-to-end software solutions in Agile environments. Strong understanding of SDLC, API integration, testing, deployment workflows, and collaborative development practices using Git. Passionate about creating maintainable, high-performance applications and quickly adapting to new technologies and frameworks.

EDUCATION

Kristu Jayanti College	2023-2026
Bachelor of Computer Applications, 7.6 CGPA	
St. Claret PU College	2021-2023
CEBA, 74%	

TECHNICAL & ANALYTICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI Design

Backend: Python, Node.js, REST API Development

Database: SQL, MySQL

Tools & Workflow: Git, GitHub, VS Code, Agile/Scrum, SDLC

Testing & Debugging: API Testing, Troubleshooting, Performance Optimization

AI & Automation: Google Gemini AI, IBM Prompt Engineering

Additional Knowledge: Authentication Concepts, API Integration, Deployment Workflows, Clean Code Practices

INTERNSHIP / WORK EXPERIENCE

Process & Web Development Intern | JIVOJAS PVT LTD, Bengaluru

Jun 2024 – Jul 2024

- Developed and maintained responsive web application features using HTML, CSS, JavaScript, and React.js.
- Collaborated with cross-functional teams in Agile sprint-based workflows to deliver scalable software solutions.
- Integrated frontend interfaces with backend APIs and optimized application responsiveness and usability.
- Performed debugging, testing, and issue resolution to improve application reliability and maintainability.
- Used Git for version control, deployment coordination, and collaborative code management.
- Contributed to reusable UI component development, improving consistency and reducing repetitive implementation effort.

PROJECTS — 4D PROCESS APPLIED

AI-Powered Resume Generator | Define → Discover → Develop → Deploy 2024

- Developed a responsive AI-integrated web application using Python, JavaScript, HTML, and CSS.
- Integrated Google Gemini AI APIs to generate personalized resume content dynamically.
- Focused on frontend responsiveness, API communication, workflow optimization, and user experience.

Loan Management System (LMS) | Process Optimization Project 2025

- Built a structured application to manage loan approvals, repayment tracking, and transaction workflows.
- Designed SQL-based data handling and reporting functionalities for operational efficiency.
- Improved process visibility through organized workflows and dashboard-driven tracking.

ChefBot — AI Conversational Agent | Process Automation & NLP 2026

- Developed a Python-based conversational assistant using NLP concepts and intelligent response workflows.
 - Implemented structured logic handling, user input processing, and automation-driven interactions.
-

CERTIFICATIONS & TRAINING

- Deloitte – Data Analytics Job Simulation (Process Analysis, Root Cause Identification)
- Data Analyst – ITC INFOTECH / ICT Academy (Data-driven Decision Making)
- Python & AI Development – Skill Studio, Kristu Jayanti University
- IBM – Prompt Engineering (AI Process Automation)
- Digital Engineering – NASSCOM FutureSkills Prime
- Salesforce Administrator Explorer – NASSCOM FutureSkills Prime (CRM Process Management)
- Infosys Springboard – Network Fundamentals
